Brake service is now more profitable!

Flo-Dynamics has eliminated the need for a second technician when performing a brake bleeding service.

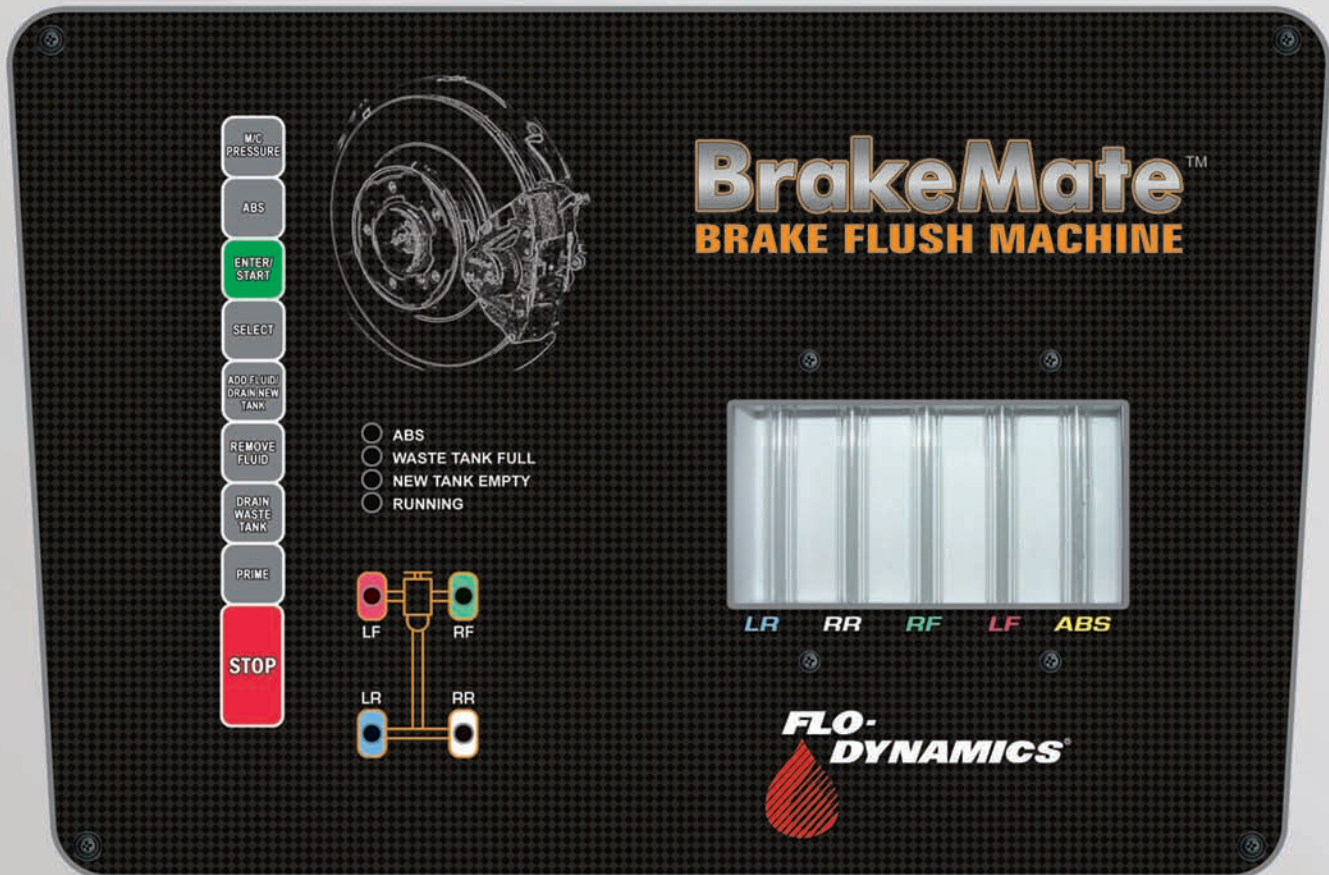

The BrakeMate provides your shop with the ability to flush and pressure test a brake system faster and easier than ever before. With a combination of automation, speed and effectiveness, the BrakeMate is the most efficient brake flushing equipment in today's market. Doesn't your shop deserve the best?

The BrakeMate simultaneously fills and vacuums the brake system to provide an efficient, safe and thorough way to flush the system. The BrakeMate is programmable to the OE recommended flushing sequence.

The BrakeMate™ offers many Advanced Features...

Just 5 easy steps starting with: Clean out the master cylinder, connect the special master cylinder adapter, connect the 4 hoses and open all 4 bleeder valves and start the machine. No "babysitting" the machine; no flipping of switches; it is all automatic. It is that simple!
